- Print pick up slips
- Customize complimentary documents (waybill, pro-forma, duty etc)
- Manage returns, refunds and RMA's
- Auto-generate PO's based upon inventory requirements
- Multi-currency and conserve the transaction in the standard currency
- Price lookup by supplier, last or historical cost
- Receive by batch, serial / lot numbers

The Challenge:

You need to capture and manage all of your companies purchasing requirements.

The Solution, FBS Purchasing Manager

FBS Purchasing

- Keep on top of all purchasing requirements with Task alerts
- Run material requirements simulations
- Review supplier performance
- Compare supplier pricing
- Create and send RFP's to multiple suppliers, then convert to PO
- Assign acceptable replacement products
- Track purchasing trends
